

MACULA GROUP, INC.

Knowledge, Clarity, Insight

Macula Group is a services organization focused on Small and Medium business enterprises. By leveraging the expertise of our three specialty practices, we approach problems holistically to provide the most comprehensive solution possible.

Specialty Practices

Staff Augmentation Service

The Macula Group Staff Augmentation Service supplies technology and business professionals. Our contract, contract-to-hire, and direct hire candidates, are among the best in their field. We have the technical and business know-how to effectively qualify the resource need and the industry experience to source the right candidate.

Macula Group builds confidence by providing properly screened candidates which saves you time and effort in hiring.

Application Services

The Application Services Practice ensures that the technology used by the business serves the business. We perform application migrations, enhancements, new application development, off-the-shelf software and hardware assessment, “whole system” validation, and quality assurance.

Our goal with each and every customer is to discover and construct the exact combination of software and hardware required to move the business forward in a cost-effective way.

Business Services

Our Business Services Practice provides workable options for action. We are not married to a particular methodology or practice; our conclusions are based on the needs of the customer. This enables us to effectively integrate into your culture and rapidly implement a solution.

Services include:

Strategic Planning, Sales and Marketing, Employee Retention Services, Executive Mentoring, and Career Coaching

With a broad and deep understanding of technical and business needs, “glove fit” solutions become a reality.

We are committed to service and ensure that the time you invest in us will be well spent.
